WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Base plate 140 x 280 x 8; rubber pad the same size bonded under
Two clevis plates 100 long x 80 high x 8, 52 apart inside
17 mm pin hole in both, 70 above the ground, 50 from the clevis ends
Clevis centred 140 from each end of the base plate
Chain lug 8 thick, 100 x 45, at the outer end; 14 mm hole 140 out
Weld clevis and lug to the base with 5 mm fillets both sides
Clamp a 52 mm spacer between the clevis plates while welding
Galvanize, then bond the pad with contact adhesive
Fits: lower leg sits between the clevis plates on an M16 bolt
through a steel crush sleeve; chains shackle to the lug
Make 3
