REVISION HISTORY

Version	Date	Author	Change
0.1	2026-11-05	Amish Chadha	First draft at the kit 1.9.1 upgrade (stage P3), for option A with option B noted

HatchSide regulatory and standards register

HatchSide is a hand-powered material-handling frame used over confined spaces, so the rules that matter most are the ones it must not be mistaken for: personnel retrieval and fall-protection equipment. Nothing in the kit is certified, nothing here is a compliance claim, and anything marked "to assess" needs a qualified reviewer before any product claim or sale. Not legal advice. Sources were checked on 2026-11-05; standard titles are as published and clauses were not read unless a row says so. Method: STANDARDS section 23.

Table 1. Regulatory and standards register.

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
G1	OSHA 29 CFR 1910.146(k)(3), permit-required confined spaces: retrieval systems	United States	Retrieval systems for entrants, including a mechanical retrieval device for vertical permit spaces more than 5 ft (1.5 m) deep	HatchSide moves tools and material and is never a personnel retrieval system (PR-018); the retrieval head only clips a line to a casualty and the haul is made on certified rescue gear (HTS-DDR-001, D2)	Design lead	Does not apply to the kit as designed; context for every use claim (to assess with a safety professional)
G2	OSHA letter of interpretation, 25 February 2013, "Permit-Required Confined Space Rescue Retrieval Lines"	United States	Interpretation of retrieval line rules in the standard above	Listed on OSHA's page for G1; the letter was not read	Design lead	To assess
G3	ANSI/ASSE Z359.4-2013, assisted-rescue and self-rescue systems, subsystems and components	United States	Personnel rescue equipment	The kit is not designed, rated or labelled for people; the labels say so (BOM line 24)	Design lead	Does not apply (by design); not read
G4	EN 795, personal fall protection equipment: anchor devices (tripods are among the products listed)	Europe	Single-user anchor devices	A crew might clip a person's harness to the head; the label and the guide-only retrieval head are the controls (RSK H1)	Design lead	Does not apply by design; misuse is a hazard (RSK H1); edition not checked, to assess
G5	EN 13157:2004+A1:2009, cranes: safety: hand powered cranes	Europe	Hand-powered cranes, including drum winches; excludes lifting persons	The nearest published standard for a hand-powered tripod hoist; used as guidance for the proof load, brake and labelling	Design lead	To assess (guidance, clauses not read; certification needed later for any EU sale)
G6	Machinery Directive 2006/42/EC (lifting machinery and lifting accessories carry CE marking)	European Union	Placing machinery and lifting accessories on the EU market	The Directive's definition of machinery turns on the drive system, and a hand winch is driven by direct human effort; whether the tripod, winch and rope count as lifting machinery or	Design lead	To assess (certification needed later if sold in the EU)

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
				accessories is a legal question		
G7	EN 362:2004, personal protective equipment against falls from a height: connectors	Europe	Connectors such as the auto-locking steel connector	The connector on the retrieval head sling (BOM line 20) is bought certified to this standard; HatchSide does not make it	Design lead	Met by purchase specification (the supplier's certificate to confirm)
G8	ISO 12100:2010, safety of machinery: risk assessment and risk reduction	International	Hazard identification and the order of risk reduction	HTS-RSK-001 follows its method as guidance for a non-certified tool	Design lead	Applies (as guidance)
G9	Prohibition of Employment as Manual Scavengers and their Rehabilitation Act, 2013, section 7	India	Prohibits hazardous cleaning of sewers and septic tanks by people	HatchSide helps crews stay outside; it does not change what the law requires	Co-design partner	Applies (context); legal review to assess
G10	NAMASTE (National Action for Mechanised Sanitation Ecosystem), Ministry of Social Justice and Empowerment with the Ministry of Housing and Urban Affairs	India	Programme to end hazardous entry into sewers and septic tanks; urban local bodies take part	The most likely route for a municipal buyer or partner; whether this kit could be listed or funded under it is not known	Co-design partner	To assess
G11	Local traffic work-zone rules for street manholes	Country and city of use	Cones, barriers and signs at an open manhole	Cones and barrier chain are in the kit (BOM line 22); the rule that applies is the city's	Co-design partner	To assess
G12	Wire rope, chain and shackle standards for lifting use	Country of use	Rating and marking of the rope, chain and shackles	The BOM asks for catalogue ratings and certificates (HTS-DEC-001, items 3 and 4); no standard is named here because none was checked	Design lead	To assess
G13	Safety data sheets and handling rules for digester sealant and for biogas (methane, hydrogen sulfide)	Country of use	Chemical handling and gas exposure	DomeReach applies a generic sealant by type; no product is named (HTS-DDR-001, D8)	Co-design partner	To assess
G14						To assess

#	Standard or regulation	Jurisdiction	What it covers	Applicability to this design	Owner (role)	Status
	Equipment for flammable atmospheres (ATEX in the EU, hazardous-location rules elsewhere)	Country of use	Equipment used in explosive atmospheres	The kit makes no claim of intrinsic safety (STM S17); gas testing comes first	Design lead	
G15	Patents around the Bandicoot arm and gripper, and expired US5431248A	Several	Freedom to operate	The preliminary screen in HTS-PRB-001 notes three Bandicoot patents and litigation; DomeReach is a single hinge with no gripper as a design-around (HTS-DDR-001, D9)	Design lead	To assess (not a legal opinion)

Status: to assess, applies, does not apply, met by design, certification needed later.
